1984 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 600-603; each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 604, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 605-608, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1984, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

The Search for Optimum Configurations for Re-entry Vehicles A84-028

Avionics Systems

A Novel Concept for Reducing Thermal Contact Resistance A84-021

Configuration Design

The Search for Optimum Configurations for Re-entry Vehicles A84-028

Navigation, Communication, and Traffic Control

NATO III Satellite Communications System Control A84-038

Structural Design (including Loads)

Analytical Model Accuracy Requirements for Structural Dynamic Systems A84-066
Critical Bending Moment of Double-Slit Tubing A84-057

Structural Materials

Ultralight Reactive Metal Foams in Space: A Novel Concept A84-093

Energy

Alternate Fuels

Roundtrip Interstellar Travel Using Laser-Pushed Lightsails A84-035

Cryogenics

Advanced Passive Radiator for Spaceborne Cyrogenic Cooling A84-029

Lasers

Concepts and Status of Laser-Supported Rocket Propulsion A84-013

Power Conditioning

Simplification of Power Electronics for Ion Thruster Neutralizers A84-087

Solar Power Satellites

Experimental Studies of Scaling Laws for Plasma Collection at High Voltages A84-053
Capacitor Bank Charging by Series-Parallel Switching of Solar Arrays A84-036

Fluid Dynamics

Boundary Layers and Convective Heat Transfer-Laminar

Heating Distributions for a 0.006-Scale Shuttle Orbiter over a Range of Hypersonic Flow Conditions A84-020

Boundary Layers and Convective Heat Transfer-Turbulent

Computational Study of Nose Bluntness Effects for Spinning Shells at Supersonic Speeds A84-004

Boundary-Layer Stability and Transition

Flat Spin of Circular Cylinders Induced by Artificial Roughness A84-075

Computational Methods

Analysis of Surface Pressure Distributions on Two Elliptic Missile Bodies A84-097
Surface Step Induced Gap Heating in the Shuttle Thermal Protection System A84-030
Numerical Solution of Space Shuttle Orbiter Flowfield A84-003

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Evaluation of Missile Aerodynamic Characteristics Using Rapid Prediction Techniques A84-095
Re-examination of the Maximum Normalized Vortex-Induced Side Force A84-081
Space Shuttle Base Heating A84-062
Flowfield Produced by Rocket Exhaust Impingement of a Multitube Launcher A84-060
Drag of a Tubular Projectile with Internal Blockage A84-039
Investigation of Freejets Issued from Small Solid-Propellant Rocket Engines A84-026

Multiphase Flows

Modeling Slag Depostion in the Space Shuttle Solid Rocket Motor A84-009

Nonsteady Aerodynamics

Determination of the Pitching Characteristics of Tumbling Bodies by the Free-Rotation Method A84-005
Engineering Approximation of Beam Flutter A84-002

Nozzle and Channel Flow

One-Dimensional Analysis of a Sleeved-Piston Gas Gun A84-077
Dual-Chamber Rocket Motor Operating Characteristics A84-032
Recent Evolution of Carbon-Carbon Nozzles for the Apogee Boost Motor A84-025

Plasmadynamics and MHD

Theory of Ion Acceleration with Closed Electron Drift A84-102
Thrust and Efficiency of the K-III MPD Thruster A84-088
Experimental and Computer Model Results on an Ion Thruster Charge-Exchange Plasma A84-064

Radiatively Coupled Flows and Heat Transfer

Absorption of Electromagnetic Radiation in an Advanced Propulsion System A84-017
Concepts and Status of Laser-Supported Rocket Propulsion A84-013

Rarefied Flows

Space Shuttle Contamination Measurements from Flights STS-1 Through STS-4 A84-055
The Shuttle Upper Atmosphere Mass Spectrometer Experiment A84-037
Investigation of Freejets Issued from Small Solid-Propellant Rocket Engines A84-026

Reactive Flows

Space Shuttle Heating Analysis with Variation in Angle of Attack and Catalycity A84-040

Subsonic Flow

Evaluation of Missile Aerodynamic Characteristics Using Rapid Prediction Techniques A84-095
Re-examination of the Maximum Normalized Vortex-Induced Side Force A84-081
Modeling Slag Depostion in the Space Shuttle Solid Rocket Motor A84-009

Supersonic and Hypersonic Flow

Analysis of Surface Pressure Distributions on Two Elliptic Missile Bodies A84-097
Test of a Probe Used to Sense Altitude Through Measurement of Pressure A84-043
Space Shuttle Heating Analysis with Variation in Angle of Attack and Catalycity A84-040
Drag of a Tubular Projectile with Internal Blockage A84-039
The Search for Optimum Configurations for Re-entry Vehicles A84-028
Computational Study of Nose Bluntness Effects for Spinning Shells at Supersonic Speeds A84-004

Viscous Nonboundary-Layer Flows

Effects of Slip and Chemical Reaction Models on Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows A84-096
Three-Dimensional Nonequilibrium Viscous Shock-Layer Flow over the Space Shuttle Orbiter A84-006
Numerical Solution of Space Shuttle Orbiter Flowfield A84-003

Wave Motion and Sloshing

Despin of a Liquid-Filled Cylinder Caused by Coning A84-022

Interdisciplinary Topics

Aerospace Technology Utilization

Measurements of Electromagnetic Interference on OV102 Columbia Using the Plasma Diagnostics Package A84-070
Plasma Diagnostics Package Initial Assessment of the Shuttle Orbiter Plasma Environment A84-069
J-Series Ion Thruster Isolator Failure Analysis A84-059

Analytical and Numerical Methods

Augmenting the Space Shuttle with a Space Station and Tug A84-104
Space Shuttle Contamination Measurements from Flights STS-1 Through STS-4 A84-055

Astrodynamics

Aspects of Nonseparating Apogee Motors A84-108
A Rectilinear Guidance Strategy for Short Orbital Transfers A84-099

Atmospheric and Space Sciences

Measurements of Electromagnetic Interference on OV102 Columbia Using the Plasma Diagnostics Package A84-070
Plasma Diagnostics Package Initial Assessment of the Shuttle Orbiter Plasma Environment A84-069
OSS-1: A Pathfinder Mission for Space Science on the Space Shuttle A84-068

Computer Software

NATO III Satellite Communications System Control A84-038

Lasers and Laser Applications

Roundtrip Interstellar Travel Using Laser-Pushed Lightsails A84-035
Concepts and Status of Laser-Supported Rocket Propulsion A84-013

Research Facilities and Instrumentation

OSS-1: A Pathfinder Mission for Space Science on the Space Shuttle A84-068

Satellite Communication Systems (including Terrestrial Stations)

NATO III Satellite Communications System Control A84-038
Analytical Results of BSE Beam Pointing and Attitude Control Performance A84-019
Unified Multiple-Beam Uplink Configuration for EHF Satellite Communications A84-018

Space Processing

Unified Multiple-Beam Uplink Configuration for EHF Satellite Communications A84-018

Launch Vehicle and Missile (LV/M) Technology

Aerodynamic Heating and Ablation

Transient Ablation of Blunt Bodies at Angles of Attack A84-046
Heating Distributions for a 0.006-Scale Shuttle Orbiter over a Range of Hypersonic Flow Conditions A84-020

Aerodynamics

Analysis of Surface Pressure Distributions on Two Elliptic Missile Bodies A84-097
Re-examination of the Maximum Normalized Vortex-Induced Side Force A84-081
Reynolds Number Effects on the Aerodynamics of a Body with Square Cross-Section A84-076
Flat Spin of Circular Cylinders Induced by Artificial Roughness A84-075
Ballistic Re-entry Vehicle Dispersion Due to Precession Stoppage A84-061
A Simple Estimation Procedure of Roll-Rate Derivatives for Finned Vehicles A84-058
Supersonic Missile Aerodynamic and Performance Relationships for Long-Range Mission Profiles A84-045
Test of a Probe Used to Sense Altitude Through Measurement of Pressure A84-043
Computational Study of Nose Bluntness Effects for Spinning Shells at Supersonic Speeds A84-004

Configurational Design

A Simple Estimation Procedure of Roll-Rate Derivatives for Finned Vehicles A84-058

Dynamics and Control

Aspects of Nonseparating Apogee Motors A84-108
Test of a Probe Used to Sense Altitude Through Measurement of Pressure A84-043
Despin of a Liquid-Filled Cylinder Caused by Coning A84-022

Launch Vehicle Systems

A Shuttle Derived Utility Vehicle for Delivery of Small Payloads to Orbit A84-109
HM60 Cryogenic Rocket Engine for Future European Launchers A84-063
Flowfield Produced by Rocket Exhaust Impingement of a Multitube Launcher A84-060
A Simple Estimation Procedure of Roll-Rate Derivatives for Finned Vehicles A84-058
Two-Stage Earth-to-Orbit Vehicles with Dual-Fuel Orbiter Propulsion A84-012

Missile Systems

Supersonic Missile Aerodynamic and Performance Relationships for Long-Range Mission Profiles A84-045

Mission Studies and Economics

Aspects of Nonseparating Apogee Motors A84-108
Augmenting the Space Shuttle with a Space Station and Tug A84-104

Propulsion and Propellant Systems

Extruded Composite Propellant Technology Development A84-106
HM60 Cryogenic Rocket Engine for Future European Launchers A84-063
Vapor Flow into a Capillary Propellant-Acquisition Device A84-050
Two-Stage Earth-to-Orbit Vehicles with Dual-Fuel Orbiter Propulsion A84-012

Sounding Rocket Systems

Rocket Vehicle Targeting for the PLACES Ionospheric Plasma Test Series A84-014

Structural Design (including Loads)

A Survey of Payload Integration Methods A84-079
Analytical Model Accuracy Requirements for Structural Dynamic Systems A84-066
Honeycomb Sandwich Structure for Future Space Transportation Systems with Integral Cryogenic Tankage A84-047

Testing, Flight and Ground

Flowfield Produced by Rocket Exhaust Impingement of a Multitube Launcher A84-060
Measurement and Analysis of High-Frequency Pressure Oscillations in Solid Rocket Motors A84-049
Acoustic Emission Techniques for Locating Internal Leakage of Redundant Components A84-007

Trajectories and Tracking Systems

Rocket Vehicle Targeting for the PLACES Ionospheric Plasma Test Series A84-014

Propulsion

Combustion and Combustor Designs

Combustion of RDX/AP Composite Propellants at Low Pressures A84-091
Dual-Chamber Rocket Motor Operating Characteristics A84-032

Combustion Stability, Ignition, and Detonation

Measurement and Analysis of High-Frequency Pressure Oscillations in Solid Rocket Motors A84-049
Investigation of Pyrotechnic MTV Compositions for Rocket Motor Igniters A84-042

Electric and Advanced Space Propulsion

Space Flight Test of Electric Thruster System MDT-2A A84-107
Augmenting the Space Shuttle with a Space Station and Tug A84-104
100 kWe Magnetoplasmadynamic Thruster System Design A84-103
Theory of Ion Acceleration with Closed Electron Drift A84-102
Impulse Measurement of a Pulsed-Plasma Engine on Engineering Test Satellite-IV A84-101
Improved Ion Containment Using a Ring-Cusp Ion Thruster A84-089
Thrust and Efficiency of the K-III MPD Thruster A84-088
Simplification of Power Electronics for Ion Thruster Neutralizers A84-087
Experimental and Computer Model Results on an Ion Thruster Charge-Exchange Plasma A84-064
J-Series Ion Thruster Isolator Failure Analysis A84-059
Nodal Crossing Changes for Sun Synchronous Satellites with Solar Electric Propulsion A84-056
Capacitor Bank Charging by Series-Parallel Switching of Solar Arrays A84-036
Roundtrip Interstellar Travel Using Laser-Pushed Lightsails A84-035
Electric Thruster Performance for Orbit Raising and Maneuvering A84-034
Absorption of Electromagnetic Radiation in an Advanced Propulsion System A84-017
Thrust Measurement of an Ion Engine System A84-016
Comparison of Potential Electric Propulsion Systems for Orbit Transfer A84-015

Engine Performance

Improved Ion Containment Using a Ring-Cusp Ion Thruster A84-089

Environmental Effects

Viscoelastic Creep Behavior of Filament-Wound Case Materials A84-100
Measurements of Vehicle Glow on the Space Shuttle A84-067
Experimental and Computer Model Results on an Ion Thruster Charge-Exchange Plasma A84-064
Fracture Mechanics Evaluation of Filament Wound Case Materials Subjected to Operational Environments A84-052

Fuels and Propellants, Properties of

Extruded Composite Propellant Technology Development A84-106
Combustion of RDX/AP Composite Propellants at Low Pressures A84-091

Liquid Rocket Engines and Missile Systems

LOX/Hydrocarbon Auxiliary Propulsion for the Space Shuttle Orbiter A84-105
HM60 Cryogenic Rocket Engine for Future European Launchers A84-063
Thermodynamic Considerations in Bipropellant Blowdown Systems A84-041
Two-Stage Earth-to-Orbit Vehicles with Dual-Fuel Orbiter Propulsion A84-012

Nuclear Propulsion Systems

100 kWe Magnetoplasmadynamic Thruster System Design A84-103

Solid and Hybrid Rocket Engines

Extruded Composite Propellant Technology Development A84-106
Combustion of RDX/AP Composite Propellants at Low Pressures A84-091
Measurement and Analysis of High-Frequency Pressure Oscillations in Solid Rocket Motors A84-049
Investigation of Pyrotechnic MTV Compositions for Rocket Motor Igniters A84-042
Dual-Chamber Rocket Motor Operating Characteristics A84-032
Recent Evolution of Carbon-Carbon Nozzles for the Apogee Boost Motor A84-025
Design of a Minimum Acceleration Mortar Charge A84-024
Modeling Slag Depostion in the Space Shuttle Solid Rocket Motor A84-009
Application of the Saderholm Erosive Burning Model to Nozzleless Solid Propellant Rocket Motors A84-008

Spacecraft Technology

Attitude Determination

Analytical Results of BSE Beam Pointing and Attitude Control Performance A84-019
Determination of the Pitching Characteristics of Tumbling Bodies by the Free-Rotation Method A84-005

Configurational and Structural Design (including Loads)

On Passive Damping Mechanisms in Large Space Structures A84-083
Critical Bending Moment of Double-Slit Tubing A84-057

Dynamics and Control

Modal Analysis of a Deployable Truss Using the Finite Element Method A84-086
Response of Large Space Structures with Stiffness Control A84-085
On Passive Damping Mechanisms in Large Space Structures A84-083
A Survey of Payload Integration Methods A84-079
Despin of a Liquid-Filled Cylinder Caused by Coning A84-022

Earth-Orbital Trajectories

Nodal Crossing Changes for Sun Synchronous Satellites with Solar Electric Propulsion A84-056
Electric Thruster Performance for Orbit Raising and Maneuvering A84-034
Comparison of Potential Electric Propulsion Systems for Orbit Transfer A84-015

Electric Power

Simplification of Power Electronics for Ion Thruster Neutralizers A84-087
Experimental Studies of Scaling Laws for Plasma Collection at High Voltages A84-053
Capacitor Bank Charging by Series-Parallel Switching of Solar Arrays A84-036

Entry Vehicle Aerodynamic Heating

Assessing the Orbiter Thermal Environment Using Flight Data A84-098
Effects of Slip and Chemical Reaction Models on Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows A84-096
Space Shuttle Heating Analysis with Variation in Angle of Attack and Catalycity A84-040
Surface Step Induced Gap Heating in the Shuttle Thermal Protection System A84-030
Heating Distributions for a 0.006-Scale Shuttle Orbiter over a Range of Hypersonic Flow Conditions A84-020
Three-Dimensional Nonequilibrium Viscous Shock-Layer Flow over the Space Shuttle Orbiter A84-006
Numerical Solution of Space Shuttle Orbiter Flowfield A84-003

Entry Vehicle Aerodynamics

Flat Spin of Circular Cylinders Induced by Artificial Roughness A84-075
Ballistic Re-entry Vehicle Dispersion Due to Precession Stoppage A84-061
Comparison of Shuttle Orbiter Surface Pressures with Wind Tunnel and Theoretical Predictions A84-044
The Shuttle Upper Atmosphere Mass Spectrometer Experiment A84-037
The Search for Optimum Configurations for Re-entry Vehicles A84-028
Hypersonic Mach Number and Real Gas Effects on Space Shuttle Orbiter Aerodynamics A84-027
Determination of the Pitching Characteristics of Tumbling Bodies by the Free-Rotation Method A84-005

Entry Vehicle Configuration Design

The Search for Optimum Configurations for Re-entry Vehicles A84-028

Entry Vehicle Dynamics and Control

Ballistic Re-entry Vehicle Dispersion Due to Precession Stoppage A84-061

Entry Vehicle Structural Design

Effect of Simulated Mission Loads on Orbiter Thermal Protection System Undensified Tiles A84-082
Honeycomb Sandwich Structure for Future Space Transportation Systems with Integral Cryogenic Tankage A84-047

Entry Vehicle Subsystems

Assessing the Orbiter Thermal Environment Using Flight Data A84-098

Entry Vehicle Testing, Flight and Ground

Assessing the Orbiter Thermal Environment Using Flight Data A84-098
Hypersonic Mach Number and Real Gas Effects on Space Shuttle Orbiter Aerodynamics A84-027

Extra-Vehicular Activity

A Rectilinear Guidance Strategy for Short Orbital Transfers A84-099

Meteoroid and Radiation Protection

Contamination by Fibers on Space Shuttle Flight OSS-1 Microabrasion Foil Experiment A84-074
Three-Dimensional Wake Model for Low Earth Orbit A84-023

Mission Analysis

Space Shuttle Contamination Measurements from Flights STS-1 Through STS-4 A84-055
Comparison of Potential Electric Propulsion Systems for Orbit Transfer A84-015

Missions and Economics

A Shuttle Derived Utility Vehicle for Delivery of Small Payloads to Orbit A84-109
Nodal Crossing Changes for Sun Synchronous Satellites with Solar Electric Propulsion A84-056

Navigation, Guidance, and Flight-Path Control

A Rectilinear Guidance Strategy for Short Orbital Transfers A84-099

Propulsion Systems Integration

LOX/Hydrocarbon Auxiliary Propulsion for the Space Shuttle Orbiter A84-105
100 kWe Magnetoplasmadynamic Thruster System Design A84-103
Vapor Flow into a Capillary Propellant-Acquisition Device A84-050
Thermodynamic Considerations in Bipropellant Blowdown Systems A84-041
Acoustic Emission Techniques for Locating Internal Leakage of Redundant Components A84-007

Signatures and Tracking

Influence of Particulates on Infrared Emission from Tactical Rocket Exhausts A84-080
Radio Frequency Fields Generated by the S-Band Communication Link on OV102 A84-071

Simulation

Experimental Studies of Scaling Laws for Plasma Collection at High Voltages A84-053

Sterilization

Contamination by Fibers on Space Shuttle Flight OSS-1 Microabrasion Foil Experiment A84-074

Systems

Radio Frequency Fields Generated by the S-Band Communication Link on OV102 A84-071

Temperature Control

Thermal Canister Experiment on OSS-1 A84-073
Theoretical Analysis of Infrared Radiation Shields of Spacecraft A84-054

Advanced Passive Radiator for Spaceborne Cyrogenic Cooling A84-029
A Novel Concept for Reducing Thermal Contact Resistance A84-021

Testing, Flight and Ground

Radio Frequency Fields Generated by the S-Band Communication Link on OV102 A84-071
Measurements of Electromagnetic Interference on OV102 Columbia Using the Plasma Diagnostics Package A84-070
Acoustic Emission Techniques for Locating Internal Leakage of Redundant Components A84-007

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Engineering Approximation of Beam Flutter A84-002

Materials, Properties of

Viscoelastic Creep Behavior of Filament-Wound Case Materials A84-100
Ultralight Reactive Metal Foams in Space: A Novel Concept A84-093
Fracture Mechanics Evaluation of Filament Wound Case Materials Subjected to Operational Environments A84-052
Effects of Thermal Cycling on Mechanical Properties of Graphite Polyimide A84-051
Mechanical Properties of the Shuttle Orbiter Thermal Protection System Strain Isolator Pad A84-048
Superplastic Forming and Diffusion Bonding of Inconel 718 A84-011

Structural Composite Materials

Viscoelastic Creep Behavior of Filament-Wound Case Materials A84-100
Fracture Mechanics Evaluation of Filament Wound Case Materials Subjected to Operational Environments A84-052
Effects of Thermal Cycling on Mechanical Properties of Graphite Polyimide A84-051
Recent Evolution of Carbon-Carbon Nozzles for the Apogee Boost Motor A84-025
Design and Development of the INTELSAT V Graphite-Epoxy Central Thrust Tube A84-010

Structural Design

Ultralight Reactive Metal Foams in Space: A Novel Concept A84-093
Critical Bending Moment of Double-Slit Tubing A84-057
Honeycomb Sandwich Structure for Future Space Transportation Systems with Integral Cryogenic Tankage A84-047
Design and Development of the INTELSAT V Graphite-Epoxy Central Thrust Tube A84-010

Structural Durability (including Fatigue and Fracture)

Radiation Effects on Vibrational Heating of Polymers A84-090
Mechanical Properties of the Shuttle Orbiter Thermal Protection System Strain Isolator Pad A84-048
Predictive Surveillance Technique for Air-Launched Rocket Motors A84-031

Structural Dynamics

Modal Analysis of a Deployable Truss Using the Finite Element Method A84-086
Response of Large Space Structures with Stiffness Control A84-085
Analytical and Experimental Vibration and Buckling Characteristics of a Pretensioned Stayed Column A84-084
On Passive Damping Mechanisms in Large Space Structures A84-083
Effect of Simulated Mission Loads on Orbiter Thermal Protection System Undensified Tiles A84-082
A Survey of Payload Integration Methods A84-079
Analytical Model Accuracy Requirements for Structural Dynamic Systems A84-066
Dynamic Analysis of Structures with Friction Forces at Sliding Junctures A84-033
Engineering Approximation of Beam Flutter A84-002

Thermal Stresses

Radiation Effects on Vibrational Heating of Polymers A84-090
Predictive Surveillance Technique for Air-Launched Rocket Motors A84-031
Radiant Heating Tests of Several Liquid-Metal Heat-Pipe Sandwich Panels A84-001

Thermophysics and Thermochemistry

Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

Results from a "Small Box" Real-Time Molecular Contamination Monitor on STS-3 A84-072
Transient Ablation of Blunt Bodies at Angles of Attack A84-046

Heat Conduction

A Novel Concept for Reducing Thermal Contact Resistance A84-021

Heat Pipes

Thermal Canister Experiment on OSS-1 A84-073
Radiant Heating Tests of Several Liquid-Metal Heat-Pipe Sandwich Panels A84-001

Radiation and Radiative Heat Transfer

Influence of Scattering on Infrared Signatures of Rocket Plumes A84-092
Radiation Effects on Vibrational Heating of Polymers A84-090
Influence of Particulates on Infrared Emission from Tactical Rocket Exhausts A84-080
Space Shuttle Base Heating A84-062
Theoretical Analysis of Infrared Radiation Shields of Spacecraft A84-054
Advanced Passive Radiator for Spaceborne Cyrogenic Cooling A84-029

Radiatively Coupled Flows and Heat Transfer

Influence of Scattering on Infrared Signatures of Rocket Plumes A84-092
Influence of Particulates on Infrared Emission from Tactical Rocket Exhausts A84-080
Absorption of Electromagnetic Radiation in an Advanced Propulsion System A84-017

Thermal Control

Thermal Canister Experiment on OSS-1 A84-073
Results from a "Small Box" Real-Time Molecular Contamination Monitor on STS-3 A84-072
Theoretical Analysis of Infrared Radiation Shields of Spacecraft A84-054
Vapor Flow into a Capillary Propellant-Acquisition Device A84-050
Radiant Heating Tests of Several Liquid-Metal Heat-Pipe Sandwich Panels A84-001

Thermal Modeling and Analysis

Influence of Scattering on Infrared Signatures of Rocket Plumes A84-092
Space Shuttle Base Heating A84-062
Surface Step Induced Gap Heating in the Shuttle Thermal Protection System A84-030

Thermal Surface Properties

Effects of Slip and Chemical Reaction Models on Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows A84-096
Results from a "Small Box" Real-Time Molecular Contamination Monitor on STS-3 A84-072

Thermochemistry and Chemical Kinetics

Three-Dimensional Nonequilibrium Viscous Shock-Layer Flow over the Space Shuttle Orbiter A84-006

Chronological Index

A84-001 Radiant Heating Tests of Several Liquid-Metal Heat-Pipe Sandwich Panels. Charles J. Camarda, *NASA Langley Research Center*; and Al Basiulis, *Hughes Aircraft Company* (**21**, 1, p. 4) Synoptic based on AIAA Paper 83-0319

A84-002 Engineering Approximation of Beam Flutter. L. E. Ericsson, *Lockheed Missiles & Space Company* (**21**, 1, p. 6) Article based on AIAA Paper 81-1672

A84-003 Numerical Solution of Space Shuttle Orbiter Flowfield. John V. Rakich, *NASA Ames Research Center*; Ethiraj Venkatapathy, J. C. Tannehill and Prabhu,Dinesh, *Iowa State University* (**21**, 1, p. 9) Article based on AIAA Paper 82-0028

A84-004 Computational Study of Nose Bluntness Effects for Spinning Shells at Supersonic Speeds. Walter B. Sturek, Bernard Guidos and Charles J. Nietubicz, *U.S. Army Ballistic Research Laboratory* (**21**, 1, p. 16) Article based on AIAA Paper 82-1341

A84-005 Determination of the Pitching Characteristics of Tumbling Bodies by the Free-Rotation Method. Takashi Yoshinaga, Kenji Inoue and Atsushi Tate, *National Aerospace Laboratory, Japan* (**21**, 1, p. 21) Article

A84-006 Three-Dimensional Nonequilibrium Viscous Shock-Layer Flow over the Space Shuttle Orbiter. M. D. Kim, S. Swaminathan and Clark H. Lewis, *Virginia Polytechnic Institute and State University* (**21**, 1, p. 29) Article based on AIAA Paper 83-0487

A84-007 Acoustic Emission Techniques for Locating Internal Leakage of Redundant Components. H. Wichmann and D. Phillips, *The Marquardt Company* (**21**, 1, p. 36) Article based on AIAA Paper 82-1255

A84-008 Application of the Saderholm Erosive Burning Model to Nozzleless Solid Propellant Rocket Motors. Clark D. Mikkelsen, *U. S. Army Missile Command*; and G. Patrick Roys, *Morton-Thiokol* (**21**, 1, p. 41) Article based on AIAA Paper 82-1146

A84-009 Modeling Slag Depostion in the Space Shuttle Solid Rocket Motor. S. Boraas, *Morton-Thiokol, Inc.* (**21**, 1, p. 47) Article based on AIAA Paper 82-1061

A84-010 Design and Development of the INTELSAT V Graphite-Epoxy Central Thrust Tube. N. Barberis, *Ford Aerospace & Communications Corporation*; M. Zilani and C. Gabriel, *Societe Nationale Industrielle Aerospatiale* (**21**, 1, p. 55) Article based on AIAA Paper 82-0677 CP823

A84-011 Superplastic Forming and Diffusion Bonding of Inconel 718. W. T. Chandler, A. K. Ghosh and W. M. Mahoney, *Rockwell International* (**21**, 1, p. 61) Article based on AIAA Paper 82-1249

A84-012 Two-Stage Earth-to-Orbit Vehicles with Dual-Fuel Orbiter Propulsion. James A. Martin, *NASA Langley Research Center* (**21**, 1, p. 65) Article based on AIAA Paper 82-1150

A84-013 Concepts and Status of Laser-Supported Rocket Propulsion. Ronald J. Glumb and Herman Krier, *University of Illinois at Urbana-Champaign* (**21**, 1, p. 70) Article

A84-014 Rocket Vehicle Targeting for the PLACES Ionospheric Plasma Test Series. L. R. Rollstin, *Sandia National Laboratories, Albuquerque* (**21**, 1, p. 80) Article based on AIAA Paper 82-1723 CP828

A84-015 Comparison of Potential Electric Propulsion Systems for Orbit Transfer. R. M. Jones, *Jet Propulsion Laboratory, California Institute of Technology* (**21**, 1, p. 88) Article based on AIAA Paper 82-1871

A84-016 Thrust Measurement of an Ion Engine System. Hiroshi Murakami, Masahiro Hirata and Isao Kudo, *Electrotechnical Laboratory (Japan)* (**21**, 1, p. 96) Article based on AIAA Paper 82-1915

A84-017 Absorption of Electromagnetic Radiation in an Advanced Propulsion System. Anil Gulati and Charles L. Merkle, *The Pennsylvania State University* (**21**, 1, p. 101) Article based on AIAA Paper 82-1950

A84-018 Unified Multiple-Beam Uplink Configuration for EHF Satellite Communications. Reuben E. Eaves, *COMSAT Corporation*; and Dean P. Kolba, *M.I.T. Lincoln Laboratory* (**21**, 1, p. 108) Article based on AIAA Paper 82-0485 CP821

A84-019 Analytical Results of BSE Beam Pointing and Attitude Control Performance. Sachio Shimoseko and Hidetoshi Murakami, *Radio Research Laboratories (Japan)*; Ryo Mochizuki and Seiki Yokoyama, *Nippon Hoso Kyokai*; Makoto Kajikawa and Katsuyoshi Arai, *National Space Development Agency of Japan* (**21**, 1, p. 113) Article based on AIAA Paper 82-0550 CP821

A84-020 Heating Distributions for a 0.006-Scale Shuttle Orbiter over a Range of Hypersonic Flow Conditions. Charles G. Miller, *NASA Langley Research Center* (**21**, 1, p. 120) Engineering Note based on AIAA Paper 82-0826

A84-021 A Novel Concept for Reducing Thermal Contact Resistance. R. S. Cook, K. H. Token and R. L. Calkins, *McDonnell Aircraft Company* (**21**, 1, p. 122) Engineering Note based on AIAA Paper 82-0886

A84-022 Despin of a Liquid-Filled Cylinder Caused by Coning. Roger F. Gans, *ARRADCOM-U. S. Army Ballistic Research Laboratory* (**21**, 1, p. 124) Engineering Note

A84-023 Three-Dimensional Wake Model for Low Earth Orbit. I. Katz, D. L. Cooke, D. E. Parks and M. J. Mandell, *S-CUBED*; and A. G. Rubin, *Air Force Geophysics Laboratory* (**21**, 1, p. 125) Engineering Note

A84-024 Design of a Minimum Acceleration Mortar Charge. G. R. Simpers and K. P. Hall, *Naval Ordnance Station, Indian Head* (**21**, 1, p. 127) Engineering Note based on AIAA Paper 82-1147

A84-025 Recent Evolution of Carbon-Carbon Nozzles for the Apogee Boost Motor. P. J. Donguy, *Societe Europeenne de Propulsion (France)* (**21**, 2, p. 129) Synoptic based on AIAA Paper 82-1187

A84-026 Investigation of Freejets Issued from Small Solid-Propellant Rocket Engines. J. Allegre, *Societe d' Etudes et de Services pour Souffleries et Installations Aerothermodynamiques (France)*; M. Raffin, *Societe d'Etudes et de Services pour Souffleries et Installations Aerothermodynamiques (France)*; and J.-C. Lengrand, *Laboratoire d'Aerothermique du Centre National de la Recherche Scientifique (France)* (**21**, 2, p. 131) Article

A84-027 Hypersonic Mach Number and Real Gas Effects on Space Shuttle Orbiter Aerodynamics. J. R. Maus, B. J. Griffith and K. Y. Szema, *Calspan Field Services, Incorporated*; and J. T. Best, *Arnold Engineering Development Center* (**21**, 1, p. 136) Article based on AIAA Paper 83-0343

A84-028 The Search for Optimum Configurations for Re-entry Vehicles. Tony C. Lin and Wallis R. Grabowsky, *TRW Electronics and Defense Sector*; and Kevin E. Yelmgren, *Ballistic Missile Office, Norton Air Force Base* (**21**, 2, p. 142) Article

A84-029 Advanced Passive Radiator for Spaceborne Cyrogenic Cooling. Steven Bard, *Jet Propulsion Laboratory, California Institute of Technology* (**21**, 2, p. 150) Article

A84-030 Surface Step Induced Gap Heating in the Shuttle Thermal Protection System. D. H. Petley, D. M. Smith, C. L. W. Edwards, A. B. Carlson and H. H.II Hamilton, *NASA Langley Research Center* (**21**, 2, p. 156) Article based on AIAA Paper 83-0120

A84-031 Predictive Surveillance Technique for Air-Launched Rocket Motors. G. J. Svob, *Aerojet Tactical Systems Company*; and K. W. Bills Jr., *Aerojet Strategic Propulsion Company* (**21**, 2, p. 162) Article based on AIAA Paper 82-1097
Errata (**21**, 4, p. 416)

A84-032 Dual-Chamber Rocket Motor Operating Characteristics. J. F. McFillin Jr., S. T. Van Brocklin, J. E. Beakley and D. W. Netzer, *Naval Postgraduate School* (**21**, 2, p. 168) Article

A84-033 Dynamic Analysis of Structures with Friction Forces at Sliding Junctures. David Hunt and William Adams, *The Aerospace Corporation*; and Tim Bock, *MacNeal-Schwendler Corporation* (**21**, 2, p. 175) Article

A84-034 Electric Thruster Performance for Orbit Raising and Maneuvering. Harold R. Kaufman and Raymond S. Robinson, *Colorado State University* (**21**, 2, p. 180) Article based on AIAA Paper 82-1247

A84-035 Roundtrip Interstellar Travel Using Laser-Pushed Lightsails. Robert L. Forward, *Hughes Research Laboratories* (**21**, 2, p. 187) Article

A84-036 Capacitor Bank Charging by Series-Parallel Switching of Solar Arrays. K. Ijichi, *INTELSAT*; and W. J. Billerbeck, *COMSAT Laboratories* (**21**, 2, p. 196) Article based on AIAA Paper 82-1878

A84-037 The Shuttle Upper Atmosphere Mass Spectrometer Experiment. R. C. Blanchard, Roy J. Duckett and Edwin W. Hinson, *NASA Langley Research Center* (**21**, 2, p. 202) Article based on AIAA Paper 82-1334

A84-038 NATO III Satellite Communications System Control. N. Sanli, *NATO Integrated Communications System (Belgium)*; S. C. Lo, S. L. Kota and M. H. Aronson, *Ford Aerospace & Communications Corporation* (**21**, 2, p. 209) Article based on AIAA Paper 82-0487 CP821

A84-039 Drag of a Tubular Projectile with Internal Blockage. R. H. Nunn and W. A. Bry, *Naval Postgraduate School* (**21**, 2, p. 216) Engineering Note

A84-040 Space Shuttle Heating Analysis with Variation in Angle of Attack and Catalycity. R. N. Gupta, J. N. Moss, A. L. Simmonds, J. L. Shinn and E. V. Zoby, *NASA Langley Research Center* (**21**, 2, p. 217) Engineering Note based on AIAA Paper 83-0486

A84-041 Thermodynamic Considerations in Bipropellant Blowdown Systems. H. C. Hearn, *Lockheed Missiles & Space Company* (**21**, 2, p. 219) Engineering Note

A84-042 Investigation of Pyrotechnic MTV Compositions for Rocket Motor Igniters. Arie Peretz, *Armament Development Authority (Israel)* (**21**, 2, p. 222) Engineering Note based on AIAA Paper 82-1189

A84-043 Test of a Probe Used to Sense Altitude Through Measurement of Pressure. Allen E. Fuhs and Kenneth D. Tillotson, *Naval Postgraduate School* (**21**, 3, p. 225) Synoptic based on AIAA Paper 82-1361

A84-044 Comparison of Shuttle Orbiter Surface Pressures with Wind Tunnel and Theoretical Predictions. P. F. Bradley, P. M. Siemers III and K. J. Weilmuenster, *NASA Langley Research Center* (**21**, 3, p. 227) Article based on AIAA Paper 83-0119

A84-045 Supersonic Missile Aerodynamic and Performance Relationships for Long-Range Mission Profiles. Robert J. Krieger, *McDonnell Douglas Astronautics Company* (**21**, 3, p. 234) Article based on AIAA Paper 82-1289

A84-046 Transient Ablation of Blunt Bodies at Angles of Attack. Norio Arai and Takashi Tani, *Tokyo Noko University*; and Kiyoshi Sato, *Institute of Space and Astronautical Science (Japan)* (**21**, 3, p. 241) Article based on AIAA Paper 83-0583

A84-047 Honeycomb Sandwich Structure for Future Space Transportation Systems with Integral Cryogenic Tankage. John L. Shideler, *NASA Langley Research Center*; Allan R. Swegle, *Boeing Aerospace Company*; and Roger A. Fields, *NASA Dryden Flight Research Facility* (**21**, 3, p. 246) Article based on AIAA Paper 82-0653 CP823

A84-048 Mechanical Properties of the Shuttle Orbiter Thermal Protection System Strain Isolator Pad. James Wayne Sawyer, *NASA Langley Research Center* (**21**, 3, p. 253) Article based on AIAA Paper 82-0789 CP823

A84-049 Measurement and Analysis of High-Frequency Pressure Oscillations in Solid Rocket Motors. P. M. J. Hughes, *Energy, Mines and Resources Canada*; and E. Cerny, *University of Montreal* (**21**, 3, p. 261) Article based on AIAA Paper 82-1241

A84-050 Vapor Flow into a Capillary Propellant-Acquisition Device. F. T. Dodge and E. B. Bowles, *Southwest Research Institute* (**21**, 3, p. 267) Article based on AIAA Paper 83-1380

A84-051 Effects of Thermal Cycling on Mechanical Properties of Graphite Polyimide. Stephen S. Tompkins, *NASA Langley Research Center*; and Sharon L. Williams, *Kentron Technical Center* (**21**, 3, p. 274) Article based on AIAA Paper 82-0710 CP823

A84-052 Fracture Mechanics Evaluation of Filament Wound Case Materials Subjected to Operational Environments. H. Bau and S. W. Beckwith, *Hercules Aerospace Division* (**21**, 3, p. 281) Article based on AIAA Paper 82-1070

A84-053 Experimental Studies of Scaling Laws for Plasma Collection at High Voltages. Andrei Konradi, Bernard McIntyre and Andrew E. Potter, *NASA Johnson Space Center* (**21**, 3, p. 287) Article

A84-054 Theoretical Analysis of Infrared Radiation Shields of Spacecraft. David L. Shealy, *University of Alabama in Birmingham* (**21**, 3, p. 293) Article

A84-055 Space Shuttle Contamination Measurements from Flights STS-1 Through STS-4. H. K. F. Ehlers, S. Jacobs and L. J. Leger, *NASA Johnson Space Center*; and E. Miller, *NASA Marshall Space Flight Center* (21, 3, p. 301) Article based on AIAA Paper 83-0331

A84-056 Nodal Crossing Changes for Sun Synchronous Satellites with Solar Electric Propulsion. V. V. Fosnight, *TRW Electronics and Defense*; and Robb M. Fosnight, *Redondo Beach, California* (21, 3, p. 309) Article based on AIAA Paper 82-1873

A84-057 Critical Bending Moment of Double-Slit Tubing. Fred Rimrott, *University of Toronto*; and Sherry Draisey, *Spar Aerospace Limited (Canada)* (21, 3, p. 316) Engineering Note

A84-058 A Simple Estimation Procedure of Roll-Rate Derivatives for Finned Vehicles. Sheo Prakash, *Instituto de Atividades Espaciais (Brazil)*; and D. D. Khurana, *Vikram Sarabhai Space Centre (India)* (21, 3, p. 318) Engineering Note

A84-059 J-Series Ion Thruster Isolator Failure Analysis. J. W. Campbell and R. T. Bechtel, *NASA Marshall Space Flight Center*; and J. R. Brophy, *Colorado State University* (21, 4, p. 321) Synoptic based on AIAA Paper 82-1907

A84-060 Flowfield Produced by Rocket Exhaust Impingement of a Multitube Launcher. Stanley A. Bouslog, John J. Bertin and William B. Wingert III, *The University of Texas at Austin* (21, 4, p. 323) Article based on AIAA Paper 82-0946

A84-061 Ballistic Re-entry Vehicle Dispersion Due to Precession Stoppage. T. C. Lin and W. R. Grabowsky, *TRW Electronics and Defense Sector*; K. E. Yelmgren, *Ballistic Missile Office, Norton Air Force Base*; and M. Landa, *Aerospace Corporation* (21, 4, p. 330) Article based on AIAA Paper 82-1307

A84-062 Space Shuttle Base Heating. Terry F. Greenwood and Young C. Lee, *NASA Marshall Space Flight Center*; Robert L. Bender, *REMTECH, Inc.*; and Robert E. Carter, *Lockheed Missiles & Space Company* (21, 4, p. 339) Article based on AIAA Paper 83-1544

A84-063 HM60 Cryogenic Rocket Engine for Future European Launchers. M. F. Pouliquen, *Societe Europeenne de Propulsion* (21, 4, p. 346) Article based on AIAA Paper 82-1250

A84-064 Experimental and Computer Model Results on an Ion Thruster Charge-Exchange Plasma. S. B. Gabriel, *Jet Propulsion Laboratory, California Institute of Technology*; and H. R. Kaufman, *Colorado State University* (21, 4, p. 354) Article based on AIAA Paper 82-1946

A84-065 Performance Data Comparison of the Inert Gas RIT 10. K. H. Groh, H. W. Loeb and H. W. Velten, *University of Giessen (FRG)* (21, 4, p. 360) Article based on AIAA Paper 82-1932

A84-066 Analytical Model Accuracy Requirements for Structural Dynamic Systems. Jay-Chung Chen, *Jet Propulsion Laboratory, California Institute of Technology* (21, 4, p. 366) Article based on AIAA Paper 82-0734 CP823

A84-067 Measurements of Vehicle Glow on the Space Shuttle. S. R. Mende and R Nobles, *Lockheed Palo Alto Research Laboratory*; P. M. Banks, *STAR Laboratory/SEL*; O. K. Garriott and J. Hoffman, *NASA Johnson Space Center* (21, 4, p. 374) Article

A84-068 OSS-1: A Pathfinder Mission for Space Science on the Space Shuttle. Werner M. Neupert, *NASA Goddard Space Flight Center* (21, 4, p. 382) Article based on AIAA Paper 83-0249

A84-069 Plasma Diagnostics Package Initial Assessment of the Shuttle Orbiter Plasma Environment. Stanley D. Shawhan, Gerald B. Murphy and Jolene S. Pickett, *University of Iowa* (21, 4, p. 387) Article based on AIAA Paper 83-0253

A84-070 Measurements of Electromagnetic Interference on OV102 Columbia Using the Plasma Diagnostics Package. Stanley D. Shawhan and Gerald B. Murphy, *University of Iowa*; and Dwight L. Fortna, *NASA Goddard Space Flight Center* (21, 4, p. 392) Article

A84-071 Radio Frequency Fields Generated by the S-Band Communication Link on OV102. Gerald B. Murphy and Stanley D. Shawhan, *University of Iowa* (21, 4, p. 398) Synoptic

A84-072 Results from a °Small Box° Real-Time Molecular Contamination Monitor on STS-3. R. Triolo, R. Kruger and R. McIntosh, *NASA Goddard Space Flight Center*; C. Maag, *Jet Propulsion Laboratory*; and P. A. Porzio, *U. S. Air Force* (21, 4, p. 400) Article based on AIAA Paper 83-0251

A84-073 Thermal Canister Experiment on OSS-1. Stanford Ollendorf, *NASA Goddard Space Flight Center* (21, 4, p. 405) Article

A84-074 Contamination by Fibers on Space Shuttle Flight OSS-1 Microabrasion Foil Experiment. D. G. Dixon, W. C. Carey and J. A. M. McDonnell, *University of Kent at Canterbury (UK)* (21, 4, p. 410) Engineering Note

A84-075 Flat Spin of Circular Cylinders Induced by Artificial Roughness. Takashi Yoshinaga, Atsushi Tate and Kenji Inoue, *National Aerospace Laboratory (Japan)* (21, 4, p. 411) Engineering Note

A84-076 Reynolds Number Effects on the Aerodynamics of a Body with Square Cross-Section. D. C. Daniel, *Air Force Armament Laboratory, Eglin Air Force Base*; G. J. Zollars and T. R. Yechout, *United States Air Force Academy* (21, 4, p. 413) Engineering Note

A84-077 One-Dimensional Analysis of a Sleeved-Piston Gas Gun. Meziane Harhad, *Southern University*; and Robert W. Courter, *Louisiana State University* (21, 4, p. 415) Engineering Note

A84-079 A Survey of Payload Integration Methods. R. C. Engels, *University of Tennessee Space Institute*; R. R. Craig Jr., *The University of Texas at Austin*; and H. W. Harcrow, *Martin Marietta Aerospace* (21, 5, p. 417) Survey Paper

A84-080 Influence of Particulates on Infrared Emission from Tactical Rocket Exhausts. H. F. Nelson, *Air Force Rocket Propulsion Laboratory* (21, 5, p. 425) Article based on AIAA Paper 82-0913

A84-081 Re-examination of the Maximum Normalized Vortex-Induced Side Force. J. P. Reding and L. E. Ericsson, *Lockheed Missiles & Space Company* (21, 5, p. 433) Article based on AIAA Paper 83-0458

A84-082 Effect of Simulated Mission Loads on Orbiter Thermal Protection System Undensified Tiles. P. A. Cooper, R. Miserentino, J. W. Sawyer and J. D. Leatherwood, *NASA Langley Research Center* (21, 5, p. 441) Article based on AIAA Paper 82-0790 CP823

A84-083 On Passive Damping Mechanisms in Large Space Structures. H. Ashley, *Stanford University* (**21**, 5, p. 448) Article based on AIAA Paper 82-0639 CP823

A84-084 Analytical and Experimental Vibration and Buckling Characteristics of a Pretensioned Stayed Column. W. K. Belvin, *NASA Langley Research Center* (**21**, 5, p. 456) Article based on AIAA Paper 82-0775 CP823

A84-085 Response of Large Space Structures with Stiffness Control. J.-C. Chen, *Jet Propulsion Laboratory, California Institute of Technology* (**21**, 5, p. 463) Article based on AIAA Paper 83-0344

A84-086 Modal Analysis of a Deployable Truss Using the Finite Element Method. D. V. Hutton, *Washington State University* (**21**, 5, p. 468) Article

A84-087 Simplification of Power Electronics for Ion Thruster Neutralizers. R. P. Gruber, *NASA Lewis Research Center* (**21**, 5, p. 473) Article based on AIAA Paper 82-1880

A84-088 Thrust and Efficiency of the K-III MPD Thruster. T. Yoshikawa and Y. Kagaya, *Osaka University (Japan)*; and K. Kuriki, *Institute of Space and Astronautical Science (Japan)* (**21**, 5, p. 481) Article based on AIAA Paper 82-1887

A84-089 Improved Ion Containment Using a Ring-Cusp Ion Thruster. J. S. Sovey, *NASA Lewis Research Center* (**21**, 5, p. 488) Article based on AIAA Paper 82-1928

A84-090 Radiation Effects on Vibrational Heating of Polymers. I. S. Habib, *The University of Michigan* (**21**, 5, p. 496) Article based on AIAA Paper 83-1505

A84-091 Combustion of RDX/AP Composite Propellants at Low Pressures. T. Kuwahara, *Nissan Motor Company, Ltd. (Japan)*; and N. Kubota, *Japan Defense Agency* (**21**, 5, p. 502) Article based on AIAA Paper 82-1114

A84-092 Influence of Scattering on Infrared Signatures of Rocket Plumes. H. F. Nelson, *University of Missouri-Rolla* (**21**, 5, p. 508) Engineering Note

A84-093 Ultralight Reactive Metal Foams in Space: A Novel Concept. F. H. Cocks, *Duke University* (**21**, 5, p. 510) Engineering Note

A84-095 Evaluation of Missile Aerodynamic Characteristics Using Rapid Prediction Techniques. J. Sun and R. M. Cummings, *Hughes Aircraft Company* (**21**, 6, p. 513) Article

A84-096 Effects of Slip and Chemical Reaction Models on Three-Dimensional Nonequilibrium Viscous Shock-Layer Flows. S. Swaminathan, D. J. Song and Clark H. Lewis, *Virginia Polytechnic Institute and State University* (**21**, 6, p. 521) Article

A84-097 Analysis of Surface Pressure Distributions on Two Elliptic Missile Bodies. Jerry M. Allen and James L. Pittman, *NASA Langley Research Center* (**21**, 6, p. 528) Article

A84-098 Assessing the Orbiter Thermal Environment Using Flight Data. S. D. Williams, *Lockheed Engineering and Management Services Company, Inc.*; and Donald M. Curry, *NASA Lyndon B. Johnson Space Center* (**21**, 6, p. 534) Article

A84-099 A Rectilinear Guidance Strategy for Short Orbital Transfers. S. Alan Stern, *Martin Marietta Aerospace* (**212**, 6, p. 542) Article

A84-100 Viscoelastic Creep Behavior of Filament-Wound Case Materials. S. W. Beckwith, *Hercules* (**21**, 6, p. 546) Article

A84-101 Impulse Measurement of a Pulsed-Plasma Engine on Engineering Test Satellite-IV. M. Hirata and H. Murakami, *Electrotechnical Laboratory:Sakura-mura (Japan)* (**21**, 6, p. 553) Article

A84-102 Theory of Ion Acceleration with Closed Electron Drift. Harold R. Kaufman, *Colorado State University* (**21**, 6, p. 558) Article

A84-103 100 kWe Magnetoplasmadynamic Thruster System Design. L. K. Rudolph, *Martin Marietta Corporation*; and D. Q. King, *Jet Propulsion Laboratory, California Institute of Technology* (**21**, 6, p. 563) Article

A84-104 Augmenting the Space Shuttle with a Space Station and Tug. Jess M. Sponable and Aaron R. DeWispelare, *USAF* (**21**, 6, p. 573) Article

A84-105 LOX/Hydrocarbon Auxiliary Propulsion for the Space Shuttle Orbiter. G. F. Orton and T. D. Mark, *McDonnell Douglas Astronautics Company* (**21**, 6, p. 580) Article

A84-106 Extruded Composite Propellant Technology Development. C. E. Haff Jr., *Naval Ordnance Station, Indian Head* (**21**, 6, p. 587) Article

A84-107 Space Flight Test of Electric Thruster System MDT-2A. Shi-Ming An, Han-Ji Wu and Xue-Zhang Feng, *SSTC Academia Sinica, Beijing (China)*; and Wen-Xi Liu, *SSTC Academia Sinica. Beijing (China)* (**21**, 6, p. 593) Engineering Note

A84-108 Aspects of Nonseparating Apogee Motors. K. K. Biswas, *Vikram Sarabhai Space Center (India)* (**21**, 6, p. 594) Engineering Note

A84-109 A Shuttle Derived Utility Vehicle for Delivery of Small Payloads to Orbit. I. O. MacConochie and J. A. Martin, *NASA Langley Research Center*; E. R. Hischke, *NASA Johnson Space center*; and E. P. Brien, *Kentron Technical Center* (**21**, 6, p. 596) Engineering Note

Errata (**21**, 5, p. 512)
